My Chess-Hans Ree 2013-10-07 The Ideal Chess Journalist During his active chess career, Hans Ree battled with almost all the great chessplayers, including eight world champions, from Max Euwe to Anatoly Karpov. My Chess is not only about them, but also about other players and writers from the past who are admired by Ree This book gives a personal view of Ree's own world of chess, and therefore less prominent players also appear, such as a schoolmate with whom he played an endless series of matches, or the anonymous "A6648," who played more than a half-million games on the Internet Chess Club. In addition, the question is finally answered why the great Dutch author W.F. Hermans designed a chess set made of cigarette lighters, but did not want to play chess. Though the game of chess and its practitioners are certainly not idealized, this book is in the first place, a loving description of a world brimming with striking personalities, and an inexhaustible source of stories. About the Author Grandmaster Hans Ree (1944) is a four-time Dutch champion, and represented his country from 1966 through 1994 in every chess Olympiad. From 2001-2007, he was the rearer of the "Euwe Ring," an award for outstanding service to Dutch chess. He writes about chess in NRC Handelsblad, New in Chess magazine, and on the American website Russell-Enterprises.com. Internationally he is considered to be one of the best chess writers of his era. "A grandmaster, excellent writer and careful researcher who doesn't seek out controversy, but is equally unafraid to plumb the sometimes murky depths of chess politics, Ree is an ideal chess journalist." - Jon Speelman, The Observer

Chess Life- 2004

Play Unconventional Chess and Win-Noam Manella The computer has changed the way top players think about chess. The silicon mind has no psychological barriers. It is "willing" to check moves that most humans, including top players, consider absurd and reject instantly. Thus this brave, new computer era inevitably leads to a reassessment of old axioms, principles and evaluations. In this book the reader will discover the incredible power unconventional moves can have. These moves contradict the most fundamental principles of the "old chess", and yet most of them played by leading grandmasters. At first sight these moves look so strange that the reader can not avoid asking, "Was this grandmaster was inspired or drunk?" The answer will definitely surprise you.

The Power of Pawns-Jorg Hickl 2016-05-11 'If you want to improve at chess, you must know the characteristics of typical pawn formations. Understanding the pawn structure is a key tool when you are evaluating a position on the board. One simple pawn move can ruin your position or win the game. Post-beginners should know the basic essentials of chess structures and that is what this modern training manual focuses on. Experienced chess teacher Jörg Hickl helps you to: - Assess the strengths and weaknesses of pawn structures - Recognize strategic patterns - Identify how you can improve your position - Develop a plan of action The Power of Pawns provides common sense guidance and Jörg Hickl uses practical examples to explain typical structures, strategies and plans. His tips and exercises are both highly enjoyable and to the point.

The Best I Saw in Chess-Stuart Rachels 2020-04-10 At the U.S. Championship in 1989, Stuart Rachels seemed bound for the cellar. Ranked last and holding no IM norms, the 20-year-old amateur from Alabama was expected to get waxed by the American top GMs of the day that included Seirawan, Gulko, Dzindzichashvili, deFirmian, Benjamin and Browne. Instead, Rachels pulled off a gigantic upset and became the youngest U.S. Champion since Bobby Fischer. Three years later he retired from competitive chess, but he never stopped following the game. In this wide-ranging, elegantly written, and highly personal memoir, Stuart Rachels passes on his knowledge of chess. Included are his duels against legends such as Kasparov, Anand, Spassky, Ivanchuk, Gelfand and Miles, but the heart of the book is the explanation of chess ideas interwoven with his captivating stories. There are chapters on tactics, endings, blunders, middlegames, cheating incidents, and even on how to combat that rotten opening, the Réti. Rachels offers a complete and entertaining course in chess strategy. At the back are listed 110 principles of play—bits of wisdom that arise naturally in the book's 24 chapters. Every chess player will find it difficult to put this sparkling book down. As a bonus, it will make you a better player.

Forcing Chess Moves-Charles Hertan 2014-02-01 Charles Hertan, an experienced chess coach from Massachusetts, has made an astonishing discovery: the failure to consider key winning moves is often due to human bias, since your brain tends to disregard many winning moves because they are counter-intuitive or look unnatural. Charles Hertan's radically different approach is: use COMPUTER EYES and always look for the most forcing move first! By studying forcing sequences according to Hertan's method you will develop analytical precision, improve your tactical vision, overcome human bias and staleness, and enjoy the calculation of difficult positions. By recognizing moves that matter, you will win more games!

The Six Power Moves of Chess, 3rd Edition-William G. Karneges 2015-06-27 The Six Power Moves of Chess could be called "The Missing Chess Lesson," because "The Six Power Move Thinking Process" is what is needed most by most players and what is missing from the chess books on your bookshelf. Nothing will improve your game faster than this revolutionary insight into chess which shows the unifying force to both strategy and tactics. Many players don't need to "get better" or learn more per se, what they need is a different model for choosing the best moves. The Six Power Moves are the key to the skillful jousting and maneuvering of the chess pieces in unknown and random positions to gain both tactical and strategic advantages, the skill which separates all players. Suitable for players of all levels from amateur to tournament chess players below expert level. Includes a mini beginner primer. Includes sample Spot the Power Move training videos! Modern Defence-Jon Speelman 2000 The Modern Defence leads to sharp and dynamic positions from the very first few moves. Black concedes space in the center with a view to launching a counterattack based on his powerful bishop fianchetto. As leading grandmasters such as Alexei Shirov, Mikhail Gurevich and Jon Speelman himself have shown on numerous occasions, when it works, the Modern Defence is truly a spectacular weapon. This book will show you how to put it to use in your own games. (6 x 9, 160 pages, diagrams)

Game Changer-Matthew Sadler 2019-02-15 AlphaZero, the self-learning artificial intelligence system created by DeepMind, had been fed nothing but the rules of the Royal Game when it beat the world's strongest chess engine. The games that were published created a sensation: how was it possible to play in such a brilliant and risky style and not lose a single game against an opponent of superhuman strength? Matthew Sadler and Natasha Regan investigated more than two thousand previously unpublished games by AlphaZero. They also had unparalleled access to its developers and were offered a unique look 'under the bonnet'. Sadler and Regan reveal AlphaZero's thinking process and tell the story of its creation. Game Changer also presents a collection of lucidly explained chess games of astonishing quality. Both professionals and club players will improve their game by studying AlphaZero's stunning discoveries in every field that matters: opening preparation, piece mobility, initiative, attacking techniques, long-term sacrifices and much more. Game Changer offers intriguing insights into the opportunities and horizons of Artificial Intelligence. With a foreword by former World Chess Champion Garry Kasparov and an introduction by DeepMind CEO Demis Hassabis.
